SUMMARY

Security-focused Computer Science graduate (Cybersecurity concentration) with hands-on experience in SIEM monitoring, threat detection, vulnerability assessment, and systems administration across Linux and networked environments. CompTIA Security+, Network+, and A+ certified and an ISO/IEC 27001 Lead Auditor, with working knowledge of SOC 2 and GRC frameworks.

EDUCATION

High Point University – High Point, NC

May 2026

B.S. in Computer Science, Cybersecurity Concentration

Major GPA: 3.39/4.0 | Dean's List: Spring 2023, Spring 2024, Fall 2024, Spring 2026

Certifications: CompTIA Security+, Network+, A+ | ISO/IEC 27001:2022 Lead Auditor | CySA+ (In Progress)

EXPERIENCE

Digital Cloak LLC – Stafford, VA

June 2025 – August 2025

Systems Administration Intern

- Collaborated with a team of four interns to deploy and manage a command-and-control (C2) server used to penetration-test multiple vulnerable systems across the company's internal network environment.
- Developed and executed a phishing campaign using Evilginx2 to harvest credentials, revealing that 19% of employees were susceptible and prompting a company-wide security awareness training initiative.
- Conducted an external network assessment and OSINT reconnaissance on employees, identifying and documenting potential attack surfaces and providing actionable remediation recommendations to leadership for implementation.
- Gained hands-on experience with a SIEM platform, monitoring and analyzing network traffic and security events to detect anomalies and investigate potential threats.

High Point University – High Point, NC

August 2024 – January 2025

Information Technology Assistant

- Resolved hardware and software issues for students and faculty, managing an average of 25+ support tickets per week through ServiceNow and prioritizing incoming requests based on severity to minimize system downtime across campus.
- Educated end users on IT best practices including password management, phishing awareness, multi-factor authentication, and responsible data handling procedures for students and faculty across the university.
- Assisted with device imaging, system configuration, and deployment of university-managed hardware for new students and faculty members during seasonal on-boarding periods and mid-year equipment refreshes.

PROJECTS – alexjwilcox.com/projects

Personal Website

- Designed and deployed a portfolio site via Netlify to showcase technical projects, certifications, and relevant cybersecurity experience. Built a custom, responsive front-end with a clean, professional layout.

Custom SIEM Tool

- Built a self-made SIEM tool to collect, parse, and correlate system and network logs into a centralized view. Surfaced security-relevant events using custom detection rules and configurable alerting on anomalous activity.

Network-Wide DNS Filtering & Forward Proxy

- Deployed a self-hosted Pi-hole as a network-wide DNS sinkhole and forward proxy across all home network devices. Configured custom blocklists and DNS routing to block ads and trackers and harden network privacy.

Software Engineering Capstone Project

- Led a four-person team as lead developer to build a full-stack airline booking platform with a React/Vite frontend and Python/Flask/MySQL backend. Managed the full software development life cycle from design through deployment.

TECHNICAL SKILLS

Security Operations & Analysis: SIEM Monitoring, Threat Detection, Vulnerability Assessment, OSINT

Governance, Risk & Compliance: SOC 2, ISO 27001, Trust Service Criteria, Risk Assessment, Security Auditing

Systems & Networking: Linux Administration, Active Directory, Docker, Network Architecture, TCP/IP, DNS/DHCP, ServiceNow

Programming & Scripting: Python, Bash, C, C++, C#, JavaScript, HTML/CSS

Tools: Wireshark, Nmap, Burp Suite, Git/GitHub, Vim

AI-Augmented Workflows: LLM-Assisted Code & Vulnerability Auditing, Agentic Tooling (Claude Code), Prompt Engineering
